

Gunawan

Cilacap Regency, Central Java, Indonesia | 082136102653 | gunawann.dev@gmail.com

I am an informatics engineering graduate who has an interest in web-based and android applications. I have skills in programming languages such as PHP, Java, and Kotlin. I also mastered several frameworks such as Laravel, Java spring, and Android SDK. During my studies, I have participated in various activities to expand my knowledge in web and android programming. I have experience in web development of PT Allure Allumunio's manufacturing information system in Kedaireka activities. I also have experience participating in the Bangkit Academy 2023 program by taking the Mobile Development learning path, and participating in the Independent Study program at Binar Academy by taking the Backend Java Course learning path. I have a strong interest in technology and am always looking for ways to improve my skills. I love learning new things and constantly innovating to create better and more effective technology solutions. I believe that with my skills in web and android programming, I can make significant contributions in the field of information technology and bring positive benefits to society.
